SUMMARY

Computer Science undergraduate (Class of 2027) seeking Software Engineer and Full Stack Developer roles, with hands-on experience building and deploying scalable applications using React, Next.js, Node.js, Express, PostgreSQL, MongoDB, Redis, and REST APIs. Strong foundation in data structures, algorithms, backend engineering, and system design, with 550+ LeetCode problems solved and a Codeforces Expert rating.

EDUCATION

JSS Academy of Technical Education

Bachelor of Technology in Computer Science | CGPA: 7.56/10

Lucknow Public School

Class XII (Senior Secondary) | Percentage: 81.2%

Noida, Uttar Pradesh

2023 – 2027

Lucknow, Uttar Pradesh

2020 – 2021

PROJECT EXPERIENCE

ApplySync | [Live](#) | [GitHub](#) (Private) | **Tech Stack:** React, Node.js, PostgreSQL, pgvector, Redis Jul 2026 – Present

- Designed a multi-tenant job-search platform with **PostgreSQL Row-Level Security** as defense-in-depth beyond application-layer tenant checks.
- Built **content-addressed JD storage** (SHA-256 dedup) so parsing/embedding cost scales with unique postings, not total applications, across a system aggregating **8** job-discovery sources.
- Implemented semantic gap analysis using **pgvector** and **HNSW-based** approximate nearest-neighbor search across resume and job-description embeddings.
- Streamed real-time AI analysis (Gap, Prep, Tailor) via **SSE**, backed by **BullMQ** + **Redis** background workers and a 15-min materialized dashboard view.

DevCollab | [Live](#) | [GitHub](#) | **Tech Stack:** Next.js, TypeScript, Node.js, MongoDB, Socket.io May 2026 – Present

- Built a multi-tenant engineering workspace with task management, secure file sharing, and real-time team collaboration, supporting **50+** active projects.
- Developed a RESTful API with Node.js and MongoDB, applying database indexing and query optimization to cut average query latency by **30%** for high-frequency user directory lookups.
- Implemented JWT-based authentication and role-based access control (RBAC), isolating multi-tenant workspace data and preventing unauthorized access across **4** distinct user roles.

HealthPulse | [Live](#) | [GitHub](#) | **Tech Stack:** Next.js, Express, MongoDB, Redis, Socket.io Apr 2026 – Present

- Built a centralized real-time healthcare coordination platform enabling low-latency updates for hospital bed/resource telemetry, emergency routing, and patient dispatching.
- Engineered a live synchronization network with **Socket.io** (Redis adapter) and Redis caching, cutting API response latency by **75%** to under **50ms** while supporting **1,000+** concurrent clients.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Socket.io, REST APIs

Databases & Caching: PostgreSQL, MongoDB, Redis, pgvector

Tools & Platforms: Git, GitHub, Docker, GitHub Actions, Prisma, BullMQ, Vercel, Render

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Codeforces: Expert**, peak rating **1660**, with **200+** problems solved across graph theory, greedy methods, dynamic programming, and mathematics.
- Ranked **149th** of **15,000+** participants in Codeforces Round 1105 (Div. 2), highlighting advanced algorithmic problem-solving skills.
- LeetCode: 550+** problems solved; contest rating **1684**.
